

RESPIRATORY THERAPY SET-UP AND OPERATIONS

Respiratory therapists deliver all scheduled nebs. RT is also available to assist the cabin nurse with assessments, medication administration, asthma education and health service shifts.

1. Camper sign in sheet
2. Information board for communication
3. Delivery system for nebulized medications
4. Check daily RT sheet (neon orange) in chart – used only if camper has scheduled nebs
5. Portable nebulizers are stored and charged in RT
6. Spirometry is available and performed if ordered by physician (or nurse practitioner if appropriate)
7. Respiratory therapists collect campers for scheduled nebs and return them to activities
